

WHY BIOBIZZ?

Product innovation and quality control lies at the heart of our success. Our philosophy is pure and simple: to be ecologically aware and make the organic cultivation of crops accessible for everyone, without leaving behind any negative impact on the environment.

Our scientists and technicians use the very latest technology available to research, develop and manufacture all Biobizz® products. All our new and existing products are subjected to regular, thorough inspections. You can be sure the highest level of research and development has gone into them. It's why we can claim that every Biobizz® product consistently contains the correct amount of organic ingredients.

Biobizz® products are user-friendly and you can rely on the quality and consistency. From planting seeds to picking the first produce, we are leaders in the field when it comes to eco-friendly crop cultivation.

FULLY CERTIFIED

We are 100% guaranteed certified organic. The Enviroganic Certification from EnviroCann is our most recent certification. It reflects that all Envirocann standards regarding state and local environmental compliance are met and that organic management practices are being used. In products that are certified, were no pesticide residues detected. The Enviroganic logo represents products produced using exemplary practices, organic inputs, and in a manner exceeding current national organic standards.

PRODUCTS

- Bio-Grow®**
Organic Substrates
- ✓ Base product to stimulate growth
 - ✓ Derived from 100% organic sugar beet extract
 - ✓ A rich food source for soil microbes
 - ✓ Vitamins B1, B2, C and E

- Alg-A-Mic™**
Organic Stimulants
- ✓ Rescue in case overfeeding, deficiencies, diseases or fluctuations in temperature
 - ✓ Ensures green leaves
 - ✓ Revitalising product with a low level of NPK

- Coco-Mix™**
Organic Substrates
- ✓ Coco coir base material
 - ✓ Works as a rock wool replacement for growing all kinds of hydroponic crops
 - ✓ For seedlings, young plants and cuttings
 - ✓ Boost of quality and yields
 - ✓ Lowers pH to 5/6
 - ✓ Low EC

- Worm-Humus™**
Organic Substrate Enhancer
- ✓ Compost made from worm castings
 - ✓ All-round soil improver

*The ideal proportions to aim for are a blend of:
10 - 15% Worm-Humus™ to
85 - 90% All-Mix®.*

- Bio-Bloom™**
Organic Substrates
- ✓ For exuberant flowers that lead to tasty fruits
 - ✓ Optimum blend of nitrogen, phosphorous and potassium
 - ✓ An independently working fertilizer
 - ✓ Trace elements included

- Top-Max™**
Organic Stimulants
- ✓ Flowering strengthener (size and weight)
 - ✓ Improvement of nutrient uptake
 - ✓ Sweeter, smooth tasting crops

- All-Mix®**
Organic Substrates
- ✓ Most recognised soil in the industry
 - ✓ Heavily pre-fertilized substrate mixture
 - ✓ Sustains lush growth for weeks
 - ✓ High EC value

- Pre-Mix™**
Organic Dry Fertilizer
- ✓ Mix of many different organic ingredients
 - ✓ For optimum growth and flowering
 - ✓ Resistance to diseases and fungi

Use Pre-Mix™ as a transplant or starter fertilizer. Blend it into any soil or combine with high-quality organic worm castings.

- Fish-Mix™**
Organic Substrates
- ✓ Accelerates the growth of all living organisms in the substrate
 - ✓ Stimulates the production of microorganisms and useful bacteria
 - ✓ Transforms poor quality earth into rich, fat soil

- Root-Juice™**
Organic Stimulants
- ✓ Derived from premium humic acid and seaweed
 - ✓ Encourages vigorous root development
 - ✓ Prepares the plant to absorb nutrients more quickly

- Bio-Heaven™**
Organic Energy Booster
- ✓ Energy booster
 - ✓ Improves moisture retention
 - ✓ Stimulates enzymatic activity and fast nutrient absorption
 - ✓ Gets rid of toxins

- Acti-Vera™**
Organic Activator
- ✓ Stronger and healthier plants, both inside and out
 - ✓ Protects and activates the immune system
 - ✓ Increases germination and plant metabolism

- Light-Mix®**
Organic Substrates
- ✓ For a more controlled vigorous growth
 - ✓ For seedlings, young plants and cuttings
 - ✓ Optimal drainage
 - ✓ Middle EC value

- Leaf-Coat™**
Organic Plant Strengthenener
- ✓ Protects against insects and damaging leaf fungi
 - ✓ Ready-to-use product
 - ✓ An environmentally friendly alternative to pesticides

CERTIFICATIONS

GOOD QUALITY SOIL MARK

The Good Soil Quality Mark is an independent inspection mark for potting soil, soil improvers and fertilisers that guarantees product quality and ensures safe, contamination-free products. To make the grade, products must conform to strict requirements that apply to all raw ingredients, the production process and the final product.

POINT VERT

The Point Vert symbol is used on packaging to show that the producer contributes to reducing the environmental impact of product packaging. Also known as the Green Dot, the Point Vert was founded in Germany in the early 90s to help educate people about environmental pollution caused by waste and to create a programme to help the environment recover. The programme is financed by companies contributing when they register to use the Green Dot or Point Vert. Biobizz not only produces organic fertilisers, we also care deeply about contributing to a better environment in any way we can. So naturally we're registered under the Point Vert certificate and you'll see the little green logo on all our product packaging.

CONTROL UNION

Control Union is an international organisation for organic production inspection and certification throughout the world at a global level. It's in accordance with standard ECC Regulation No. 271/2010. This organisation guarantees that certified products do not contain any chemical fertiliser or pesticide, chemical or synthetic flavours, colours or preservatives, or genetically modified organisms (GMO).

OMRI

The Organic Materials Review Institute (OMRI) is an international non-profit organisation that determines which contributions are permitted for use in organic production and processing. OMRI's staff is managed by a Council of Directors, which is widely representative of the organic industry: assessors, farmers, suppliers, processors, traders, consumers' organisations, and animal and environmental protection groups. Products from the OMRI list are suitable for use in foodstuff processing and organic production.

ENVIROGANIC CERTIFICATION

The Enviroganic Certification is the highest level of certification from EnviroCann. It reflects that all Envirocann standards regarding state and local environmental compliance are met and that organic management practices are being used. In products that are certified, were no pesticide residues detected. The Enviroganic logo represents products produced using exemplary practices, organic inputs, and in a manner exceeding current national organic standards. After examination in the EnviroCann Material Review Program, this certification was granted to following Biobizz® products: Alg-A-Mic™ Bio-Bloom™, Bio-Grow®, Bio-Heaven™, Fish-Mix™, Root-Juice™ and Top-Max™. EnviroCann is a third-party certification organization, focused on the Quality Assurance and Quality Control of production and products.

CLEAN GREEN CERTIFIED

Clean Green Certified is a third-party certification program modeled on existing national and international agricultural standards, ensuring environmentally clean and sustainable methods. It incorporates aspects of the USDA's National Organic Program (NOP) international organic programs and sustainable farming practices. Products licensed to carry the Clean Green Certified logo contribute to the sustainability of farming. The certification is based on processing and handling standards, which certify Biobizz' ability to keep organically, sustainably-grown product separate from product grown with synthetic pesticides. The Clean Green program allows Biobizz to be distinguished from the rest, with a label that stands for legal compliance, consumer quality and environmental stewardship.

CONTROL UNION CERTIFICATIONS, NATIONAL ORGANIC PROGRAM (NOP) INPUT

Agricultural products that are sold, labelled or represented as allowed for use on organic operations must be produced and processed in accordance with the Control Union Certifications Standards based on the National Organic Program (NOP) of the US Department of Agriculture. Control Union Certifications (CU) has inspected Biobizz products and found them to be in accordance with these standards. Control Union has certified Biobizz products as an input allowed for use on organic operations. Products labelled as '100 percent organic' may only contain organically produced ingredients and processing aids, excluding water and salt. Agricultural products labelled '100 percent organic' cannot be produced using excluded methods, sewage sludge or ionizing radiation.
